1. Once, when there was nothing in the Existence, there were faint gleams penetrating through the emptiness by chances. Thus, some essences started to slightly and gradually develop.
2. After more and more conditioning amidst the emptiness with faint gleams, there occurred a single cell translucent & immaterial shapeless cluster which contained some elements synthesized from the faint gleams.
3. Thereafter, the single cell translucent & immaterial shapeless cluster secreted the elements within itself by chances like the division of a cell amidst the emptiness.
4. The mainly secreted elements were (1) the wholesome white purity (2) the unwholesome dark impurity (3) the mixed gray neutral element, and (4) some other.
5. The single cell translucent & immaterial shapeless cluster which already eliminated essences of different elemental natures later developed himself to be The Lord of Elements & Essences Origination, after an incredibly long time, with unique essential element within himself.
6. In the beginning, the secreted elements were just extremely tiny translucent blots.

7. Since then, the different translucent blots have separately evolved and developed by their own.
8. The development led to the existing of the Primordial Lord of Wholesome Elements & Essences (the Holy Lord), the Primordial Lord of Neutral Elements & Essences (the Neutral Lord), and the Primordial Lord of Unwholesome Elements & Essences (the Evil Lord or Mara or Satan). Each party have developed and evolved peacefully and separately for an incredibly long period of time until they discovered that the Evil Lord or Satan had advanced its superknowledge and preparation of force in order to seize the Existence per its evil wish as usual.
9. Since then, they started to have interaction, intervention, competition, and collision until they contaminated and manipulated each other.
10. The Holy Lord and the Evil Lord have encountered and battled each other in the Existence at the supramundane level.
11. The Holy Lord created humans with the 'mahapurusha characteristics' or 'Buddha-like body' to battle with the Evil Lord and evil force in the human form because the human body can withstand and handle the insight battle better as their lives will not cease although they are attacked by the evil party during the superknowledge and insight battle.
12. The Evil Lord applied its superknowledge to worsen and manipulate the quality of human bodies created by the Holy Lord, so there are birth, aging, illness, dying, and deformation of 'mahapurusha' bodies.
13. The encounter led to the creation of celestial and human worlds under the bargain of elements, seed natures, power, might, superknowledge

(vijja), wisdom, merit energy, sin energy, transmudane mechanism, physical mechanism, and so on.

14. After the bargain, mundane and transmudane worlds / beings were created.
15. After the bargain, the Law of Karma was created as the software that operates and governs most of the realms.
16. Merit energy is the key energy generated by the side of the Holy Lord, and this kind of energy brings about happiness, prosperity, wealth, success, good health, and etc.
17. Sin energy is the key energy generated by the side of the Evil Lord (evil Mara), and this kind of energy brings about suffering, illness, troubles, and etc.
18. The two energies are vital in operation of the Existence
19. There is the wholesome supramundane engine controlled by the Holy Lord, this engine operates the Existence within the extent of the Holy Lord.
20. There is the unwholesome supramundane engine controlled by the Evil Lord, this engine operates the Existence within the extent of the Evil Lord.
21. The two side namely the wholesome (white) and unwholesome (dark), as well as the neutral (gray) keep competing and encountering each other ever since. (Like the competing between Angel and Devil in one's mind according to the Western idea)
22. Under the law of karma, living beings earn merit energy from wholesome deeds

22.1 The wholesomeness is generated by the wholesome engine under the governing of the Holy Lord transferred to the mind of living beings (competing with the unwholesome)

22.2 When a living being commits good deeds per wholesome mind, such being earn merit energy in return and the wholesome quality in his/her mind becomes stronger (virtues)

22.3 With merit energy, living beings becomes prosperous and well per the enhancement from the Holy's side.

23. Under the law of karma, living beings earn sin energy from unwholesome deeds

23.1 The unwholesomeness is generated by the unwholesome engine under the governing of the Evil Lord and transferred to the mind of living beings (competing with the wholesome)

23.2 When a living being commits bad deeds per unwholesome mind, such being earns sin energy in return and the unwholesome quality in his/her mind becomes stronger (immorality)

23.3 With the sin energy, living beings become unwell per the enhancement from the Evil Lord's side.

24. The accumulated energies result in either wellness or unwellness (karmic fruition). When the energy is used up, beings reincarnate further in the cycle of birth except beings in the Nirvana which is not subject to reincarnation.

25. Under the law of karma, normally, beings with merit energy will be drawn to heaven for a rewarding period of time or the Nirvana (when the accumulated merit energy meets requirement or virtues perfected and mental impurity totally eradicated or ceased).

26. Under the law of karma, normally, beings with sin energy will be drawn to hell for a period of punishment.
27. Under the law of karma, humans can accumulate merit and cultivate virtues perfection through their lifetimes in the cycle of rebirth. Upon fulfillment of merit energy and virtues perfections, they can become the Lord Buddha, Silent Buddha, and enlightened Saints, who can enjoy the state of pure bliss in the Nirvana.
28. The seed elemental natures, merit energy, sin energy, wholesome essence, unwholesome essence, neither wholesome nor unwholesome essence, superknowledge (vijja), law of karma (software), mundane and supra-mundane mechanism, physical realms (hardware), non-physical realms (celestial hardware), living and non-living beings either physical or non-physical, planets, and universes are operated systematically and relatively under the governing of the Holy Lord, the Evil Lord, and the Neutral Lord under the Law of Karma derived from aforesaid bargaining.
29. The manipulation by the Evil Lord has troubled our original mission. Now, humans who cultivate good deeds until their virtues are perfected and merit energy completely fulfilled to meet the requirement will be able to return to the Nirvana to enjoy the state of pure bliss and do not subject to reincarnation except that they wish to do so (avatar) to help other human beings to achieve the Nirvana or continue their original mission which is to defeat the force of the Evil Lord with superknowledge and supernormal power made possible in meditation (insight battle).
30. Please feel free to investigate with your insight to prove if the knowledge is true or not.
